Chinese population	1,449	1,680	1,680	1,680	n/a (county)
Daytime jobs	2,273	2,760	2,760	2,760	n/a (county)
Restaurant spend / yr	\$9,596,733	\$11,566,498	\$11,566,498	\$11,566,498	n/a (county)
Chinese-food spend / yr	\$2,678,230	\$3,125,211	\$3,125,211	\$3,125,211	n/a (county)
Hunan demand / yr	\$366,917	\$428,154	\$428,154	\$428,154	n/a (county)
Age 25-44	29.6%	29.5%	29.5%	29.5%	n/a (county)
Families w/ children	29.5%	29.4%	29.4%	29.4%	n/a (county)
Area (sq mi)	0.75	5.40	24.57	65.09	n/a (county)

Method: each census block group is weighted by the share of its area inside the ring, using U.S. Census Bureau ACS 2023 5-year data; daytime jobs: back-solved from commuting population (workplace data not loaded; lower precision); "n/a (county)" = the county benchmark only carries income and the Chinese-speaking share.

How much demand the site can capture: page 9; audience profile: page 5.

The 10-minute drive area holds 1,920 households with a median household income of \$130,063; 40.3% speak Chinese at home; 2,760 daytime jobs; residents spend \$11,566,498 a year eating out.

🏠 Official statistics · Census 🏢 Official statistics · Workplace jobs · partial 🍽️ Official statistics · Dining spend

📊 Model estimate · Cuisine share 13.7%

Commuting professionals are 38% of guests; lunch is 80%

Four segments

Share = the segment's share of the households in the primary trade area (the four segments add up to 100%). Index = that same share ÷ the same segment's share of the county, × 100 — so 100 means exactly the county average and 120 means 20% over-represented. Both numbers use the same denominator; "n/a" means the county figure was not available.

Lunch / dinner

Lunch 80%	Dinner 20%
driven by workers	driven by residents
Jobs within a 10-minute walk	2,273
Avg household size, primary area	2.82
Renter households, primary area	40.1%

How it is computed

Chinese families	Chinese-speaking household share × families with children (primary trade area)
Commuting professionals	Jobs within a 10-minute walk ÷ primary-area population
Young Chinese	Chinese-speaking household share × age 25–44 share (national benchmark 28%)
Non-Chinese explorers	Non-Chinese population × income index

Lunch / dinner revenue the site can capture: page 9.

The largest segment is Commuting professionals at 38% (a share of the households in the primary trade area; the index compares that same share with the county); lunch / dinner = 80% / 20%; lunch relies on the 2,273 jobs inside the 10-minute walk area.

Shanghai / Jiangnan fits this site better (44.3); Hunan ranks #8

Store density vs Chinese-hub median

Here / 10k Chinese  23.8 places

Chinese-hub median  n/a

Chinese restaurants per 10k Chinese residents here ÷ hub median = n/a; 2 same-cuisine places in the whole metro.

Three category-gap tests

- ✗ Chinese population meets the threshold
- ✗ Restaurants per 10k Chinese residents below the hub median
- ✓ Enough other Chinese restaurants

Conclusion: Thin supply, but not a gap · Fails the three category-gap conditions: Chinese population below the threshold, density benchmark missing, 25 other Chinese restaurants

Does anyone else sell Hunan?

The menu / review text probe did not run for this report, so no category gap is claimed.

Top three better-fit alternatives

Rank	Cuisine	Score	Verdict
1	Shanghai / Jiangnan	44.3	NO GO
2	Taiwanese	44.3	NO GO
3	Skewers / Chinese BBQ	44.3	NO GO
4	Other Chinese	44.3	NO GO
5	Cantonese / BBQ	43.8	NO GO
6	Dim Sum	43.3	NO GO
7	Sichuan	43.3	NO GO
9	Northeastern Chinese	43.3	NO GO
8	Hunan your choice	43.3	NO GO

14 cuisines compared; the six dimension scores for your cuisine are on page 11.

Supply in this category is thin, but the three category-gap tests (Chinese population, store density, other Chinese restaurants) are not all met; the three best-fit alternatives are Shanghai / Jiangnan 44.3, Taiwanese 44.3, Skewers / Chinese BBQ 44.3; your Hunan ranks #8.

Settle the pre-lease conditions and the missing inputs before negotiating the lease

Pre-lease checklist

- ☐ **Condition** Negotiate rent to $\leq \$3,073/\text{mo}$ so occupancy cost $\leq 10\%$
- ☐ **Condition** Captured demand is $\$108,555/\text{mo}$ short of break-even; close it with lunch sets / delivery / banquets
- ☐ **Input to add** start-up investment (missing $\rightarrow$ payback hidden)
- ☐ **Risk to settle** 6 nearby projects under construction / approved: construction-period disruption, upside on delivery (excluded from current demand) — Neither the construction schedule nor the hoarding footprint is available, so the size of the traffic disruption cannot be derived. What to do: Add a construction-period rent abatement clause to the lease
- ☐ **Risk to settle** start-up investment not provided: payback cannot be assessed — No build-out or equipment budget was provided, so neither the payback nor the amount at stake can be derived. What to do: Re-run the report once build-out / equipment quotes are in

Lease documents

- ☐ Draft lease: term, free rent, rent steps, % rent
- ☐ Cap on CAM and NNN charges
- ☐ Build-out: TI allowance, permit responsibility
- ☐ Exhaust / gas / grease trap: condition, who pays
- ☐ Use restrictions and same-cuisine exclusivity
- ☐ Sublease / exit clauses, personal guarantee scope
- ☐ Parking and loading spaces (incl. delivery pickup)
- ☐ Rent relief during nearby construction

90-day plan

- 1 D0-7 Settle the pre-lease conditions, add missing inputs, re-run the report
- 2 D8-14 Rent negotiation: target an occupancy cost ratio $\leq 10\%$
- 3 D15-21 Walk the site 3 times: lunch / dinner / weekend traffic
- 4 D22-30 Finalize menu and ticket (anchor with set menus)
- 5 D31-45 Sign · permits · exhaust and gas work
- 6 D46-60 Launch on delivery platforms to validate demand
- 7 D61-75 Hire and train; soft opening
- 8 D76-90 Review: actual revenue vs break-even; start the risk hedges

Conditions: Negotiate rent to $\leq \$3,073/\text{mo}$ so occupancy cost $\leq 10\%$; Captured demand is $\$108,555/\text{mo}$ short of break-even; close it with lunch sets / delivery / banquets; inputs still needed: start-up investment (missing $\rightarrow$ payback hidden).
